Feedback is always a very important factor and plays a significant role in the evaluation and improvement of teaching learning and the ultimate well-being of the students in an educational institution. N. N. Saikia College has been maintaining an active feedback mechanism for all its stakeholders i.e. students, parents, alumni, teachers and employees. The feedback committee takes all necessary steps for the collection and analysis of feedbacks and in taking appropriate actions based on the analysis.

N. N. Saikia College introduces Feedback from the Employers from the year 2021 as it is very crucial for an educational institution to gather the information on the present status of its former students who are now employed in diverse jobs. Therefore, the Feedback committee prepares a Feedback Mechanism to cover the employers under whom former students are working currently as the feedback of the employers on these students reflects their qualities and the success of the institution in producing efficient workers.

Hence, the Feedback from the employers covers the areas of the communicational skill, leadership qualities, punctuality, willingness to learn new things, planning and organizational skill, team work performance, innovative ideas etc. found in the employees (former students of the college).

The feedback analysis shows that all the employers give high grades to the questions and no negative marking is recorded.
